A GLOBAL COLLABORATION PARTNER

About Kyocera Unimerco

Kyocera Unimerco is a global manufacturer, distributor and service company.

The group includes a Tooling Division, which deals with consultancy and sales of tool solutions for machining and measurement and checking tools for the manufacturing industry, and a Fastening Division, which supplies a wide range of standard nailers, brad nailers and fastener nailers and accessories and attachment items for the construction industry.

More than 50 years of experience

The Danish company was founded in 1964 under the name UNIMERCO and its head office is in Sunds, near Herning.

In 2011, all activities were taken over by the Japanese company KYOCERA. This has created an even stronger company with an expanded product range, a wide network of companies and dealers throughout the world, and an ambitious growth plan.

The KYOCERA Corporation comprises more than 290 companies, 75.000 employees and generates sales of approximately DKK 97 billion.

THE CRAFTMAN'S PROFESSIONAL PARTNER

Scandinavia's widest selection of nailers

TJEP is the name of Scandinavia's largest selection of fastening products. A complete product range with standard nailers, coil nailers, brad nailers, fasteners and compressors for the professional workman.

TJEP has more than 50 years of experience with providing advice about, selling and servicing quality tools for the professional workman.

A complete range – of fasteners also

TJEP has a complete product range of fasteners (nails, staplers, finish and brad nails) for TJEP nailers and for a wide selection of the most widely used brands, such as Paslode, Duo-Fast, Senco, MAX etc.

Compressors and accessories

TJEP also offers you a large number of high-quality compressors and accessories adapted to the needs of the various pneumatic nailers.

Re-bar binders and wire

The product range also includes TJEP re-bar binders, wire and accessories that are well-suited to the tying of both rebar and underfloor heating pipes etc.

Details that make all the difference

We firmly believe that it is worth doing things properly and going the extra mile. That's why the cornerstones of our company's philosophy are high quality, professional advice and good customer service.

BATTERY POWERED

TJEP ROD CUTTER

Powerful rod cutters that can cut off re-bars flush with the concrete surface with minimal sparking. Also ideal for threaded rods and pipes as it does not leave any burrs. The machines are available as maximum 20 mm and 30 mm with accompanying blades.

BATTERY POWERED

TJEP C-RINGER

Fast and easy assembly of wire fencing and netting with these new battery-powered C-ringers. They are brilliantly balanced and can also be used for assembling mattresses, car seats and animal cages.

TJEP QUICK-FAST®

For hidden installation of terrace boards.
With our patented* solution TJEP QUICK-FAST® you get a nicer result and at the same time avoid black rings, cracks and water traps around nails and screws on your wooden terrace.

TJEP SILENT COMPRESSORS

TJEP silent compressors are one of the quietest on the market. They enable builders to start their workday earlier or finish later as the noise is far less bothersome to neighbours and passers-by.
In addition, a silent compressor helps improve the working environment, particularly for construction projects where acoustics are often poor.

*Patent application pending.

DUPLEX

Gas nailer with high impact force!

The gas nailer TJEP FH 21/90 Duplex is the latest 21° gas nailer in the TJEP range. With its high impact force it is ideal for nailing moulds, linings, flooring and sheet materials etc. The advantage of the nail gun is that it uses double-head nails, making it easier to pull out the nails. The nailer can also shoot 21° ring nails.

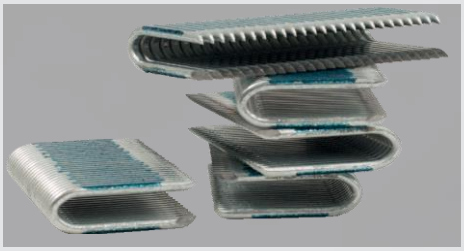
TJEP FENCING STAPLER
FS-40 GAS 3G

TJEP FS-40 GAS 3G

Gas-powered stapler for fastening wire fences etc. Perfect for the demanding tasks, and no need for compressors and hoses. The stapler is well-balazanced and extremely powerful, ensuring perfect insertion, even in hardwood.

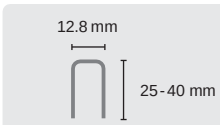
Depth of drive can be adjusted, so the stable can be inserted fully or the thread can be allowed some clearance.



The heavy-duty staples are hot-dip galvanised (HDG) and treated with a special long-life coating, ensuring maximum corrosion protection and, thus, maximum tool life.

The special design of the staples with divergent D-tips ensures great holding power, far superior to manual staples.

Including extra nose for mounting in softwood!



FS-40 Staples, p. 89

1. Great balance
2. Non-slip grip – extremely low recoil
3. Adjustable depth control
4. Top load
5. Smooth no-mark nose
6. Belt hook

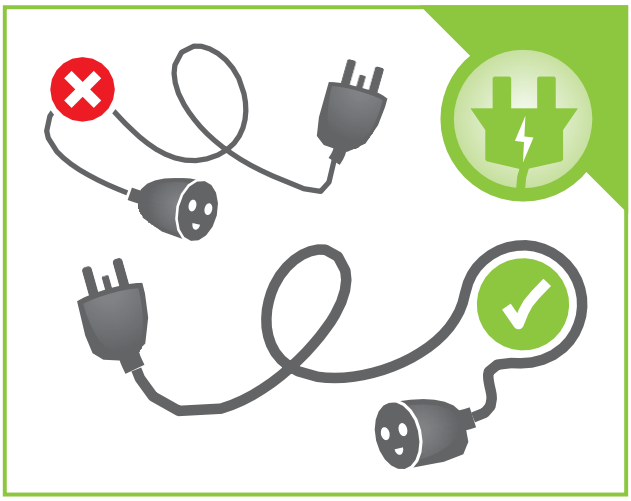
Compressors overview
109 Accessories

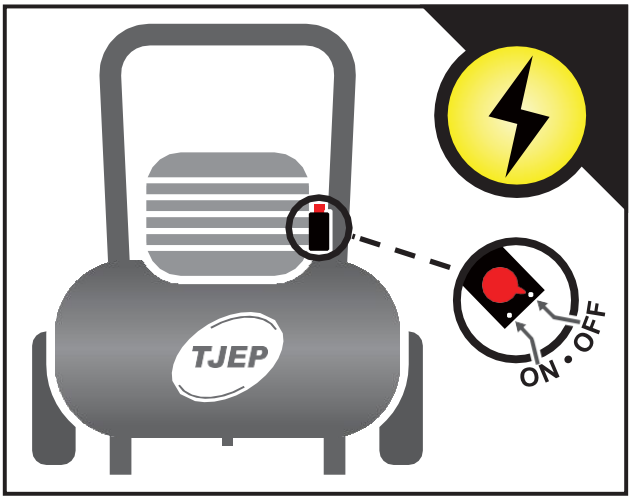
*See our **High Pressure** Compressor on page 34*

IMPORTANT!

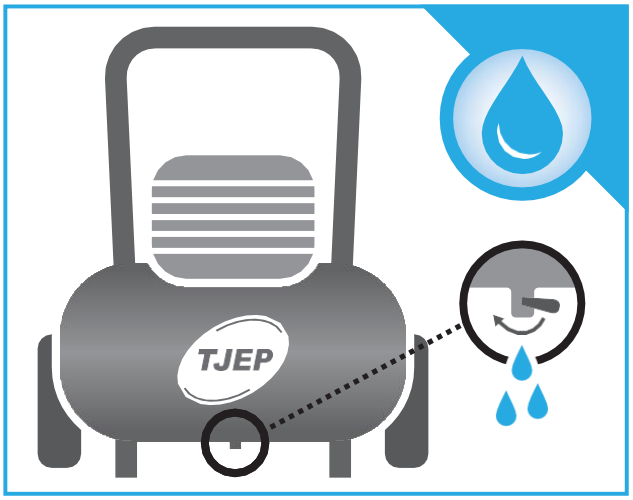


Use a **powerful extension cord** (min. 3 × 1.5 mm2) in a separate fuse group.

The compressor is designed to run in intervals of max. **total operation on 30 min.** pr. hour to ensure cooling.



Remember to **turn off the pressure switch!** Otherwise there is a risk that the compressor will not start and may be damaged.



Remember to empty the compressor tank for **condensation water** daily.

More info

We recommend that a 10 mm hose thickness is always used (item no. 106080) and that the pressure control valve is set to give a pressure between 6 and 8 bar.

Pressure regulating valve

If the compressor will not start, it is often due to too low voltage, due to a too long / thin extension cord or a non-unrolled cable drum!
